SANATH WARAIKAR

Kalyan, Thane,Maharashtra | +919896336088 | sanath.waraikar2024@nst.rishihood.edu.in

dva-portofolio.vercel.app | github.com/sanath-2512 | linkedin.com/in/sanath-waraikar

PROFESSIONAL SUMMARY

AI/ML-focused developer with hands-on experience building data-driven dashboards and machine learning solutions. Proficient in Python, Pandas, Tableau, and Power BI with a strong foundation in Data Structures & Algorithms. Passionate about solving real-world problems through intelligent systems and actionable data insights.

EDUCATION

Bachelor of Technology — Computer Science & Artificial Intelligence 2024 – 2028
Rishihood University, Sonipat, Haryana

TECHNICAL SKILLS

Data Visualisation	Tableau, Power BI, Streamlit, Google Sheets Dashboards
Programming	Python, Pandas, Jupyter Notebooks
AI / ML	Large Language Models (LLMs), Machine Learning, API Integration
Tools & Platforms	Git, GitHub, Vercel, Google Colab
Core Concepts	Data Structures & Algorithms, Full Stack Development

PROJECTS

Retail Performance Intelligence Dashboard GitHub Repo ■

GoogleSheets | DataAnalysis | Dashboarding

- Designed a comprehensive retail performance intelligence dashboard using **Google Sheets** to analyse sales and outlet performance across multiple store types.
- Dashboard surfaces key metrics including **revenue distribution, item visibility, average sales,** and trend lines — enabling data-driven operational decisions.
- Tracked over ■**18.5M** in revenue through dynamic KPI scorecards and interactive charts providing an executive-level performance overview.

India Agricultural Productivity — Interactive Tableau Dashboard GitHub Repo ■

Tableau | Python | JupyterNotebooks | Pandas

- Created an interactive **Tableau** dashboard visualising agricultural productivity trends across Indian states spanning 1997–2019 (194.98M hectares, 910.1M tonnes).
- Built data cleaning and preprocessing pipelines using **Jupyter Notebooks, Python, and Pandas** to handle and normalise large multi-year government datasets.
- Dashboard features state-level choropleth maps, 22-year historical trend lines, and seasonal breakdowns across Rabi, Kharif, and Whole-year crop seasons.
